(Comments are Numbered to Correspond with Topics Listed Above)

**1. PERMIT -**

In the near future, the permittee will be submitting a Mining and Reclamation Permit Package for this site.

**3. TOPSOIL -**

The topsoil piles were inspected with the berms functioning as required holding back sediment. Some vegetation has started to grow on top of the piles.

**4C. OTHER SEDIMENT CONTROL MEASURES -**

The silt fences, straw bales, berms, and water bars throughout the property were inspected. These alternate sediment control measures were performing as designed, holding back sediment. It appears that the complete exploration site has sediment control treatment.
