SUPPLEMENTARY INFORMATION: In accordance with Federal coal management regulations 43 CFR 4322 and 4325, a public hearing shall be held on the proposed sale to allow public comment on the discussion of the potential effects of mining the proposed lease. Not less than 30 days prior to the publication of a notice of sale, the Secretary shall solicit public comments on fair market value appraisal and maximum economic recovery and on factors that may affect these two determinations. Proprietary data marked as confidential may be submitted to the Bureau of Land Management in response to this solicitation of public comments. 5. If this tract should be evaluated as part of a potential larger mining unit and evaluated as a portion of a new potential mine (i.e., a tract which does not in itself form a logical mining unit).
6. The configuration of any larger mining unit of which the tract may be a part.
7. Restrictions to mining which may affect coal recovery.
8. The price that the mined coal would bring when sold.
9. Costs include mining and reclamation of producing the coal and tons of production.
10. The percentage rate at which anticipated income streams should be discounted, either in the absence of inflation or with inflation, in which case the anticipated rate of inflation should be given.
11. Depreciation and other tax account factors.
12. The value of any surface estate where held privately.
13. Documented information on the terms and conditions of recent and

similar coal land transactions in the lease sale area.

14. Any comparable sales data of similar coal lands.

Coal values developed by BLM may or may not change as a result of comments received from the public and changes in market conditions between now and when final economic evaluations are completed.

DATES: The public hearing will be held March 8, 1995, and comments on fair market value and maximum economic recovery must be received by April 10, 1995.
