Task 2542

ok

Wayne,

This email is in lieu of a memo for the review of a revision to Appendix 2F of the Soldier Canyon Mine MRP (Task ID 2542). The revision simply consists of the replacement of an existing plate with updates showing changes to the Dugout Mine topsoil stockpile which is located adjacent to the Soldier Canyon Mine topsoil stockpile. The plate is identical to one for the Dugout Mine MRP that was updated during the midterm review of that mine (Task ID 2528). The plate was also approved during that process by Priscilla. My finding is that the revision to Appendix 2F of the Soldier Canyon MRP should be approved. Thank you.

Steve Fluke
