Subject: Baseline Resampling for Soldier

Vicky,

From what I can find in your MRP, ***there is no commitment to resample for baseline parameters***, so you are probably fine continuing with the parameters listed in the MRP. It would be nice if you wanted to change the MRP to do so, but you don't have to.

Steve — I am sure that I could have overlooked something, so as the Hydrologist currently assigned, do you know of any commitment to resample for baseline in the Soldier Canyon MRP? If so do you know what the parameters are?

Thanks,
Dana
