**Subject:** Soldier Canyon Mid-term Revisions (Task ID #3306)

Jim and Suzanne,

A bond calculation error fell through the cracks for the Soldier Canyon mid-term. Pete Hess had identified a deficiency relative to the bond at Soldier Canyon. After the mid-term deficiency letter went out, Pete discovered that he had made a calculation error and that the mine was adequately bonded.

As a result, I've revised the mid-term letter to reflect that there are NO deficiencies relative to bonding. I've placed the revised letter and Pete's revised memo in the final folder for task #3306: **O:\007018.SOL\FINAL\WG3306**. I've placed a call to Vicky Miller and have e-mailed her a 'DRAFT' version of the document. She worked with Pete in correcting this problem, so in Pete's absence, I wanted to run the numbers by her to verify that we were all on the same page.

Long story longer, I think it's safe to go ahead and finalize the letter and Pete's memo but hold off on mailing it until I hear from Vicky and she verifies the bond numbers that Pete wrote up are what they agreed on.

Thanks,  
Steve
