**CC:** OGMCOAL

---

Vicky,

I've gone ahead and activated the sites that you requested.

**Dugout-** I've activated sites DC-4 and DC-5.

**Soldier Canyon-** I've activated the following sites:

Spring Site 5 (aka S-5 or CC-53)  
Spring Site 10 (aka S-10 Sulfur Spring 10)  
Spring Site 23 (aka S-23 or CC-36)  
Spring Site 24 (aka S-24 or CC-40)

Now with stream site G-7, the database has three sites with the site name G-7 but with three different descriptions. They are as follows:

G-7 (G-4, E-22) Soldier Ck Above Mine Property  
G-7 Blackhawk Formation and Creek Flows  
G-7 Junction of S. Creek, Pine Cyn.

I went ahead and activated all three so you can do the data entry. Let me know which of the G-7 sites is the one that you're after and I'll de-activate the other two.

Regards,  
Steve
