During the review of the Soldier Canyon Mine 2018 Annual Report, I determined that vegetation on the topsoil pile required evaluation, stated as follows:

4/03/2019, PB. The Permittee should indicate the results of the annual inspection of the topsoil site. i.e. to observe growth of weed and desirable vegetation. The last Division inspection of the site was conducted on 11/14/2017 during an OSM partial oversight. 2018 inspection reports reference the topsoil pile sign, but not the condition of the site. The Division will make a site visit during 2nd Quarter 2018.

Consequently, on July 3, 2019, I evaluated the topsoil stockpile, along with mine representatives, and that evaluation is described in Inspection Report # 6461. The report was sent to the operator and to the file on July 9, 2019.

There Soldier Canyon 2018 Annual Report review is completed.

Enjoy your day!
