Attention: Lowell Braxton

Dear Mr. Braxton:

This information is being submitted in response to your letter dated August 19, 1987, received by us on August 21, 1987.

I believe all of the Divisions comments should be addressed at this time with the exception of the sections pertaining to hydrology which will be submitted by October 5, 1987, pursuant to my conversation with you on September 16th.

This submittal is incorporated into our overall plan as Appendix K with noted acceptions and the hydrology section will be incorporated into our plan as Appendix L. This hydrology material is largely complete now and no problem is anticipated in meeting this deadline. Please note that several of the maps in Volume II pertain to hydrology and are also being upgraded and revised as necessary including 11, 12 & 13 which are Sediment Ponds and 15 and 16 which show cut and fills with all the associated drainages, as built and post reclamation. These maps will also be inserted in Volume II no later than October 5th.

Thank you very much.

Sincerely,

Michael W. Glasson
Senior Geologist
Western Operations
