Attn: Susan Linner

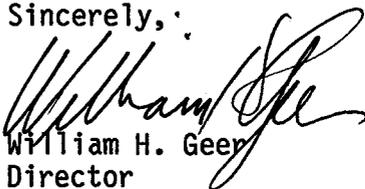

Dear Dianne:

The Division has evaluated Andalex Resources Incorporated's permit application revision for the Mining and Reclamation Plan at the Aberdeen Mine associated with their centennial project. The following information is provided for your consideration.

Section 4.9 (sediment control) - The 6.4 acres to be disturbed lies within high priority valued winter range. A portion of this acreage is critical valued riparian that will be lost due to the culverting of the Deadman Canyon drainage way. The MRP needs to be corrected to identify this situation. Also, mitigation for this loss must be addressed.

Thank you for an opportunity to review the MRP and provide comment.

Sincerely,

  
William H. Geer  
Director
