RE: Graves Lease Permit Revision, Andalex Resources Inc., Centennial Mines Complex, ACT/007/019, Folder #2, Carbon County, Utah.

In Reply Please Refer to Case No. K439

Dear Mr. Haddock:

The Utah State Historic Preservation Office received the above referenced report on 25 September 1990. The report states that the majority of work will take place underground, and will not effect any known cultural resources. We, therefore, concur with your recommendation that no historic properties will be impacted by the project.

This information is provided on request to assist the Division of Oil Gas and Mining with its responsibilities as specified in Utah Code Annotated 63-18. If you have questions or need additional assistance, please contact me at (801) 533-7039.

Sincerely,

James L. Dykman
Regulation Assistance Coordinator

Dear Mr. Haddock:

Re: Graves Lease Permit Revision, Andalex Resources Inc.,
Centennial Mines Complex, ACT/007/019, Folder #2, Carbon
County, Utah

We have completed our review of the referenced permit revision and offer the following comments:

1. We request the applicant describe in more detail the mine water system, particularly the collection of surface water for use underground. Details should include schematic diagrams, flow rates, volumes and etc.
2. The existing septic tank and drainfield was designed for 45 hourly employees. The current work force is listed at 75 hourly employees. Exceeding the design capacity may result in a failure of the system. We request the applicant work with the local health department to determine if upgrading of the system is necessary.
3. The permit section of the MRP includes a letter from Carbon County dated August 19, 1981 which grants the mine permission to dispose of waste oil at the Carbon County landfill. We strongly discourage disposal of recoverable quantities of waste oil, particularly used oil at any landfill. We recommend recoverable quantities of waste oil be recycled.

4. We recommend the Permits Section and Other Approvals Section of the MRP include the latest revision of all environmental permits. More specifically, for the Centennial Mine this would include Discharge (UPDES), Construction (sediment ponds), Sewage Disposal (Septic Tank), Air Quality, and Potable Water System permits or approvals.

If you have any questions or I can be of further assistance you may contact me at 637-3671.

Sincerely,

David R. Ariotti, P.E.
Southeast District Engineer

RE: Compliance Review for Section 510(c) Finding, Andalex Resources, Inc., Centennial Project, ACT/007/019, Carbon County, Utah

As of the writing of this letter, there are no NOV's or CO's which are not corrected or in the process of being corrected. Any NOV's or CO's that are outstanding are in the process of administrative or judicial review. There are no finalized Civil Penalties which are outstanding and overdue in the name of Andalex Resources, Inc.

Finally, they do not have a demonstrated pattern of willful violations, nor have they been subject to any bond forfeitures for any operation in the state of Utah.
