Attn.: Daron Haddock, Permit Supervisor

Re.: Response to Stipulation Deficiencies

Dear Mr. Haddock:

I enclose two copies each of the following materials:

R645-301-224:

1. Text has been upgraded (page 113-A) to describe seeding and mulching techniques used on the topsoil substitute areas. It was done in two phases.
2. Plate 6 has been updated to show Pile J. The substitute piles are depicted on Plate 6 as the slopes to the two pads (Shop pad and Apex truck loadout pad).
3. Samples have been taken of the substitute and are in the laboratory for analysis according to parameters in Table 6. These results are not yet available and Andalex is hereby requesting an extension of time to complete this response.
4. Page 114 has been corrected.

R645-301-122:

1. Andalex has provided an operational plan for treatment and handling of oil or fuel contaminated soil.
2. Andalex's SPCC plan is certified by a registered P.E. I have enclosed two more copies.

Mr. Daron Haddock

May 15, 1992

Page Two

R645-301-528.350:

Samples of roof and floor for all four seams have been taken and are currently in the lab. We will have results no later than June 24.

R645-301-536.300:

The text has been modified to clarify the contents of Appendix Q (page 191), so that this appendix is not confused with Centennial reclamation plans.

Thank you for your consideration. I have requested the soil samples be handled promptly.

Respectfully submitted,

Michael W. Glasson  
Senior Geologist
