Re: Summit Creek/Mathis Lease Expansion

Dear Mike:

Pursuant to your request I performed a file search at the Price Field Office of the BLM on April 11, 2005. The purpose of the file search was to determine the probability of archeological sites in the vicinity of your proposed lease expansion in Sections 29, 30, 31, 32, T12S, R11E, Section 36, T12S, 10E, Carbon County, Utah. The file search revealed the following:

- 1977, BYU surveyed drill holes just west of the proposed lease area. No cultural resources were located.
- 1980, Antiquities Section, Utah Division of State History, surveyed the Canyon bottoms south of the current lease expansion. They recorded the Zion, Blue Flame/Sutton and Rio Grande mines. None of the mines were considered eligible for the NRHP.
- 1984, Nickens and Associates surveyed three 160-acre blocks in Sections 29, 32 and 33. No cultural resources were located.
- 1986, SENCO-PHENIX surveyed several drill hole locations and access corridors just south of the proposed project. No cultural resources were located.

No subsidence from the proposed expansion is anticipated. The area of the proposed project has a very low probability for containing archeological sites for the following reasons:

1. The negative finding of the previous surveys, which include over 500 acres of inventory.
2. High elevation above 8,400 feet.
3. Lack of permanent water or other favorable environmental factors.

SENCO-PHENIX feels that no historic properties will be affected and recommends archeological clearance without additional archeological survey.

If we can be of further assistance please do not hesitate to contact us.

Sincerely,

John A Senullis  
Principal Investigator

Encl.
