Centennial Project, C007/0019, Carbon County, Utah
Fan Canyon Break-out, As-Built Drawing

A handwritten signature in cursive, appearing to read 'J. King', with the date '9/6/06' written below it.

Dear Ms Littig;

Enclosed are 4 copies of a map showing the exact as-built fan facility in the Left Fork of Deadman Canyon for ventilating the Aberdeen Mine. One copy was sent directly to the Price Field Office, attn: Karl Houskeeper. This construction took place primarily in 1996 and was finally completed recently in the summer of 2006.

The fan complex includes the fan house itself, a small fenced substation and three portals. This is how the facility was originally proposed and approved by the Division in 1995. Up until this construction season there were only two portals and it was decided this year that the third portal was needed to make the installation more efficient for moving the large air quantities necessary for the Aberdeen Mine.

We believe that the current bond which is in place for the Centennial complex is adequate (the MRP includes a total of 7 portals for the Aberdeen mine) however, it is possible that the Division may want to take a new look at the bond estimate. It should be noted that the four Apex Mine portals, already in the bond calculations have been sealed permanently according to our approved plan.
