Karla,

Thanks for the heads-up. I'll go ahead and upload the data. On a separate note, whatever became of the revisions to the Centennial water monitoring plan? If I recall correctly, the Division sent it back with some deficiencies and then the trail goes cold. Essentially, I wanted to see it incorporated into the main text of the approved MRP and I believe there were some other minor issues. I was just wondering what the status of that was.

Thanks Karla,  
Steve

p.s Happy New Year!

Pam,

The 4th quarter 2007 water monitoring data for UEI's Andalex Centennial Mine (C/007/019) is in the database and ready to be downloaded (or uploaded? I can never keep that straight!). Let me know if you have any questions about it.

Thanks,  
Karla
