Subject: Re: Aberdeen Mine Closure

Dave,
We were saddened to hear of this closure. Thank you for keeping us informed of the status of your mining operations. You had asked about any other notification requirements and I thought I should bring R645-301-515.320 and R645-301-515.321 to your attention. I realize that these regs are dealing with temporary cessation, but anytime a mine is shut down for over 30 days, these regs would apply. There are some notification requirements with regard to acreage disturbed, reclamation accomplished, and activities to continue during temporary cessation. You should provide this within the 30 period. Again, thanks for your help and let me know if you have any questions.

Sincerely,
Daron R. Haddock
Permit Supervisor
