Daron...Regarding Violation 10040 (Centennial, GVH), the POs have been issued for the concrete to plug the holes, and also for Scamp to do the earthwork on sites 1 and 5. We are waiting for Purchasing to issue the POs for the driller and the mechanical plugs. After that we should be able to start the reclamation as required by 10040. Therefore, I hereby request an extension of one month to abate 10040. Thanks
Dave Shaver

It sounds like you will need to request an extension on the time allowed for remedial action. Please go through Daron, and I will follow through from there. Thanks.

Pete...The purchase orders for the earthwork have been assigned, as well as for the 65 yards of plugging concrete. Requisitions for the mechanical plugs and for the drilling company will be submitted on Monday, Aug 17. (We have been waiting for competitive bids to come back.) I'm hoping we can get all POs approved by the end of next week. If we do, we will begin as soon as we can get the plugs delivered and the driller mobilized.
Dave
