Hi April...The Scamp guys should finish up at Crandall this week, and I plan to move them to Tower next week to re-install the monitoring well pump one last time, including using rigid discharge pipe, and extending the casing up a ways.

Dave

Hi Dave and Karla,

Here are your most recent 2009 water quality reports for the Centennial mine. Not much data to report on, the only point that produced any data was the well once it got back online. The pH reading was slightly alkaline so we should continue to watch those readings in the coming quarters. Also, do you have a top of casing elevation for that well? This will help me to track depth to water levels.

Thanks so much....

Regards,
April
