Ingrid...I've asked Scamp to order the seed mix you sent to me. I will amend the plan to reflect the new mix, as per your recommendation.

Dave

Thanks for the update Dave

Did you decide to use the amended seed mix? If so, please submit the new pages to the division for incorporation. Thanks!

Ingrid

To All....Please note that we clipped the Tower GVH thistle heads (for the second time) last week. Yesterday (Oct. 12) the crews finished spraying the herbicide on the reclaimed GVH pads (1 and 5). Scamp hired an experienced contractor to do the spraying. They will prepare a short report, with photos, to be presented to the Division. This spraying now starts the 21 day clock on the upcoming reseeding project, which (according to my count) could start anytime after November 3. Later this week I will order the new seed mix (agreed upon by the landowner and Division) in anticipation of the re-seeding. We will also plan on using the certified weed-free straw at the site as mulch, at an application rate of two tons per acre, as per Division instruction. We assume these actions are sufficient to abate (or extend) violation 10067. Thanks

Dave
