Daron,

Dave Shaver called today to let me know that the earthwork has been completed on wells GVH-6, GVH-12, and GVH-13. GVH-12 has been seeded. No seeding has been done to date on the other two wells. They are expecting to complete the seeding work over the Thanksgiving week (yes, there will be a crew working over the holiday if the weather cooperates).

Remaining pad sites that will likely be earmarked for reclamation work next spring are:

Contemporaneous Reclamation:

GVH 7 and 7A (single pad site w/two wells)

GVH-14

GVH-4

GVH-8

GVH-8A

GVH-9

Full Reclamation:

GVH-15

GVH-16

GVH-17
