---

Hi Dave,

Here is the Centennial (Tower) water quality monitoring report for second quarter 2011. I've met your new water sampling coordinator JD Leonard, but I do not have an email address for him as of yet.

Regards,

April

**April A. Abate**

*Environmental Scientist III*

Division of Oil, Gas and Mining

1594 W. North Temple, Suite 1210

Salt Lake City, Utah 84114-5801

*T: 801.538.5214*

*M: 801.232.1339*

Starting Tuesday, September 6, 2011, our agency hours will be 8am-5pm, Monday-Friday.

# WATER QUALITY MEMORANDUM

Utah Coal Regulatory Program

January 10, 2012

TO: File

THRU: Steve Christensen, Permit Supervisor *SCC*

FROM: April A. Abate, Environmental Scientist III *AAA 1-10-2012*

SUBJECT: 2011 2nd Quarter Water Monitoring, Andalex Resources, Centennial Mine, C/007/0019, Task ID #3831

The Centennial Mine is currently in temporary cessation. No mining or coal processing activities currently take place there, nor is the site in active reclamation. Sections 711.300 pages 7-2 through 7-10 and Appendix L of the MRP pertain to water monitoring. Water sampling locations are shown on Figure IV-11.

1. Were data submitted for all of the MRP required sites? YES  NO

### Springs

The spring in Deadman Canyon – S18-1 below the confluence of the Left and Right Forks of Deadman Canyon is sampled quarterly.

The spring reported no flow during the first quarter of 2011.

### Streams

Two stream locations are required for quarterly sampling: Site 18-3 is located in the Left Fork of Deadman Canyon above the confluence with the Right Fork of Deadman Canyon and flows on an ephemeral basis. Site 18-4 represents the right fork of Deadman Canyon below the main surface facilities.

Stream sample 18-3 at the left fork of Deadman wash has not flowed since May 2008, which was right around the same time the mine shut down. Stream sample 18-4 has not flowed since 2005. Both of these sample locations are surface water points located below the mine.

**Wells**

Well #1 is located in Deadman Canyon and is screened in the Aberdeen Sandstone below the coal seam. Well #1 was sampled during the 2nd quarter of 2011 on April 28, 2011 for operational parameters.

**UPDES**

YES  NO

A total of four UPDES discharge outfalls are permitted at the Centennial Mine. Outfall 001 represents the sediment pond discharge location. Outfall 002 represents mine discharge from the Pinnacle Mine portion of the permit area. Outfall 003 represents discharge from the second sediment pond in the permit area. Outfall 004 represents discharge from the Aberdeen Mine. All outfalls are required to be monitored on a monthly basis in accordance with UPDES Permit #UTG040000.

No discharge from any of the sample locations was reported for the 2nd quarter of 2011. Discharge has not been reported from any of the UPDES locations since June 2008, which was right around the same time the mine shut down.

**2. Were all required parameters reported for each site?**

**Springs** YES  NO

Not applicable this quarter.

**Streams** YES  NO

Not applicable this quarter.

**Wells** YES  NO

**UPDES** YES  NO

Not applicable this quarter.

**3. Were any irregularities found in the data?**

**Springs and Pond** YES  NO

Not applicable this quarter.

**Streams** YES  NO

Not applicable this quarter.

**Wells**

YES  NO

None of the parameters analyzed were outside of two standard deviations. Although the TDS to Conductivity ratio was 0.85 when generally it is accepted that this ratio should fall between 0.55-0.76.

**UPDES**

YES  NO

None of the above locations discharged during this quarter.

**4. Did the Permittee make a timely submittal of all data, including initially missing data, and satisfactorily explain irregular data?**

YES  NO

**5. Does the Mine Permittee need to submit more information to fulfill this quarter's monitoring requirements?**

YES  NO

**6. Based on your review, what further actions, if any, do you recommend?**

None

**7. Follow-up from last quarter, if necessary.**

None
