Subject: Permit Area Revision Required, UtahAmerican Energy Inc., Centennial Mine, C/007/0019,

Dear Mr. Hibbs:

The Division was recently notified by the Bureau of Land Management that the Aberdeen Logical Mining Unit has been modified. Several leases were affected with a total relinquished area of 1,986.24 acres. This relinquishment has affected the right-of-entry for the Centennial Mine and it appears that UtahAmerican Energy Inc. may no longer have right-of-entry to much of the area covered by the DOGM permit. To rectify this discrepancy, UEI will need to revise the Mining and Reclamation Plan to reflect the change in lease area and ultimately the permit area. This would include revisions to the legal section of the MRP, especially the description of the permit area. It would also require modifications to the maps that show the area permitted and the area where mining is planned. Please review your MRP and make the required changes so that the MRP will be accurate.

An amendment will need to be submitted along with the C1 and C2 forms in order to make the changes. Please submit the amendment by no later than November 11, 2013.

If you have any questions, please call me at (801) 538-5325.

Sincerely,

Daron R. Haddock  
Coal Program Manager
