Re: Permit Revision
to add Kenilworth Lease
007/019

Dear Mr. Haddock:

UtahAmerican Energy, Inc. has held the Kenilworth lease for almost six years and as of now the lease has not been added to the Approved Tower MRP. By means of this application UEI desires to add the lease to the Tower Permit.

It is our understanding since the permit area will increase 56% the submittal will be considered a significant revision. Since the expansion is totally underground there is no increase in disturbed area.

Please find attached a proposed legal notice, revised maps and revised chapters 1-8. Let me know when we can advertise. As previously discussed, UEI needs an administrative completeness by June of 2014, but will not need an approved permit until June of 2018.

Attached you will find the revisions to the approved MRP reflecting adding Kenilworth to the Permit. As was done in the previous submittals a new Appendix AB will be added to include the Kenilworth Lease within the currently approved MRP.

Since the Kenilworth lease was included in the Willow Creek permit, which has Federal Mine Approval, the submittal may not need additional Federal Approval.

If you have any questions please give me a call.

Sincerely,

R. Jay Marshall

R. Jay Marshall
Resident Agent

DIV. OF OIL, GAS & MINING

LEGAL NOTICE

Andalex Resources, Inc. has filed a complete application with the Division of Oil, Gas and Mining for a revision of the existing Mining and Reclamation Plan, C/007/019 for the Aberdeen Mine. Andalex Resources, Inc. is a subsidiary of UtahAmerican Energy, Inc. and operates the Aberdeen Mine in Dead Canyon which is located approximately 8 miles NE of the town of Price, Utah. The lease revision will increase the lease acreage by approximately 1,760 acres, with no additional surface disturbance proposed.

Underground coal mining will take place in coal reserves owned or leased by Andalex Resource, Inc. A legal description of the proposed areas for additional underground Mining and Reclamation Activities are described as follows:

Federal Lease UTU-81893 (Kenilworth Lease)
T. 12 S., R. 10 E., SLM, Utah

Section 26			
	N1/2 SW1/4	80.00	Acres

110 MINIMUM REQUIREMENTS FOR LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

111 Introduction

UtahAmerican Energy, Inc. operates the Centennial Project under the Division of Oil, Gas and Mining permit number ACT 007/019. Coal has been mined on Federal leases SL-027304, SL-063058, U-010581, U-05067-08916, UTU-66060, UTU-69600, and UTU-79975. The Centennial Project mined three different seams in various areas. The Aberdeen seam ranged from approximately 5' to 8'. The Centennial seam ranged from approximately 5' to 7' and the Lower Sunnyside seam ranged from 4' to 6'. Both Longwall and Room and Pillar methods of mining were utilized in mining the reserves. A significant amount of coal has been mined from all of the leases. Some leases have been mined out and others have very little remaining recoverable reserves.

UtahAmerican Energy, Inc. Relinquished portions of the mined out leases in two relinquishments. The first relinquishment approved 3/12/2012 reduced the Federal coal leased acreage from 5,436.24 down to 2,813.48. The second relinquishment reduced the Federal coal lease even further down to 894.55 acres remaining. UEI retained all areas of surface disturbance conducted in association with the underground mining and surface access to the gob-vent holes was retained through surface use agreements.

The permit acreage dropped from 6,516.91 down to 2,274.77 acres. When Kenilworth lease is added the permit acreage goes up to 4,035.90 which is the new permit acreage. The disturbed area has not changed and remains at 47.19 acres. Since the disturbed area has not changed and the disturbed legal description stays the same the bond does not change.

The Kenilworth lease UTU-81893 is being added to the permit at this time (1,760.00 Acres).

A new lease area legal description can be found in Table 1-1 and the new permit area is described in Table 1-2.

A General Location Map can be found as Plate 1 in the Tower MRP.

A Surface Ownership Map can be found as Plate 2 in the Tower MRP.

A Mineral Ownership Map can be found as Plate 3 in the Tower MRP.

A Lease Map can be found as Plate 4 in the Tower MRP.

Durango, Colorado 81301 (gas rights)

112.700 MSHA Numbers

Refer to the same section of the approved M&RP.

112.800 Interest in Contiguous Lands

Andalex Resources, Inc. has no interest in contiguous lands other than those currently owned as shown on Plate 1A of the approved M&RP.

112.900 Certification of Submittal Information

No information has changed in the approved M&RP because of this submittal. Refer to the same section of the approved M&RP.

113 Violation Information

Refer to the same section in the approved M&RP.

114 Right-of-Entry Information

Refer to the same section of the approved M&RP. A surface use agreement with the

private surface owners is in place. A memorandum of this agreement is included in the MRP and is on record at the County Recorder's office. (See Appendix X-1)

** Existing acres reflect contemporaneous reclamation work completed to date.

115 Status of Unsuitability Claims

Refer to the same section of the approved M&RP.

116 Permit Term

Refer to the same section of the approved M&RP.

117 Insurance, Proof of Publication, and Facilities and Structures Used in Common

The certificate of insurance(s) will be included in Appendix B of the approved M&RP.

118 Filing Fees

Refer to the same section of the approved M&RP.

120 PERMIT APPLICATION FORMAT AND CONTENTS

This amendment submittal will comply with R645-301-120.

130 REPORTING OF TECHNICAL DATA

All technical data submitted in the amendment will be accompanied by the name or organization responsible for the collection and analysis of data, dates of collection and descriptions of methodology used. Technical analyses will be planned by or under the direction of a qualified professional in the subject to be analyzed.

140 MAPS AND PLANS

The maps and plans in the Mining and Reclamation Plan will correspond with the requirements in R645-301-140.

150 COMPLETENESS

Andalex Resources, Inc. believes the information in this permit application to be complete and correct.

(Revised)
March, 2014

CHAPTER 2

SOILS

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no effect on soils. The addition of the Kenilworth Lease will not increase the disturbed areas. Only the Prime Farmland Investigation section of the regulations have been addressed. Please refer to the approved MRP for current Chapter 2 information.

2.21 Prime Farmland Investigation

The land within the Kenilworth lease area has not been historically used as cropland, contains steep slopes, and the area is not conducive to intensive agricultural uses and no surface disturbance. The Permittee does not believe that any Prime Farmland exists with the permit revision area, Kenilworth lease, being added to the Mine and Reclamation Plan. The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

Since Kenilworth lease is found in T12S R10E Section 26, the Willow Creek Permit information found below is pertinent.

Quoted Directly From the Willow Creek Permit

> Several previous investigations have been conducted for the permit area to determine whether any prime farmlands exist in the area. Each of these investigations involved formal consultation with the USDA-SCS. The initial determination, included in PRCCs Mining and Reclamation Permit application, was provided by Mr. George D. McMillan, USDA-SCS State Conservationist in a letter dated July 16, 1979. This letter concluded that, based upon the absence of any irrigation, and excessive slopes, no prime farmlands existed in the area corresponding to Townships 12 & 13 South, Ranges 8, 9 and 10 East. A second negative determination for prime farmlands in the permit area was issued in connection with the permitting efforts for the CGCC Permit submitted to UDOGM in February 1991. The CGCC permit application contains a letter dated May 21, 1991 from Mr. Ferris P. Allgood, USDA-SCS State Soil Scientist, stating that due to the excessive amount of rock fragments, high erodibility and lack of a reliable source of irrigation waters for lands within the CGCC Mine Permit area, the soils within this area are excluded from consideration as important farmlands. Confirmation of these negative determinations was included in the findings documents issued by UDOGM for both permit applications and documentation is provided in Exhibit 5, Soils Information. Since the limitations which exclude these soils for consideration as prime farmlands still exist, and all surface disturbance associated with the mining and reclamation activities will occur on either previously disturbed areas or on slopes greater than ten percent,

UIXXJM is requested to reaffirm the negative determination regarding the presence of prime farmland soils in the permit area.

A regional Soils Map can be found in the Willow Creek Permit Map #3. This map covers the Kenilworth Lease Area as well as the total Willow Creek Permit Area.

March, 2014

CHAPTER 3

BIOLOGY

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no effect on vegetation, fish or wildlife.

The Biology portion of the disturbed area of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (007/019) for current Chapter 3 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

A regional vegetation map of the area can be found as See Map 5 of the Willow Creek Mine Permit ACT/007/004.

A regional Wildlife map can be found in the Willow Creek Mine Permit as Map #7.

A Raptor survey map can be found as Plate 34A in the Tower Permit.

A Mule Deer Range map can be found as Plate 34B in the Tower Permit.

An Elk Range map can be found as Plate 34C in the Tower Permit.

A Sage Grouse Range map can be found as Plate 34D in the Tower Permit.

The Land Use & Air Quality portions of the disturbed area of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 4 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Land Use or Air Quality surveys should not be required.

Prior to mining the Permittee will consult with the Division to discuss additional or updated surveys and or studies that might be necessary prior to second mining.

The extension of the underground workings will not result in any additional surface disturbance therefore additional T&E or Raptor surveys should not be required. Prior to mining the Permittee will consult with the Division to discuss additional or updated surveys and or studies that might be necessary prior to second mining.

(Revised)
March, 2014

CHAPTER 4

LAND USE & AIR QUALITY

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no effect on Land Use or Air Quality.

The Land Use & Air Quality portions of the disturbed area of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 4 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004. A regional Land Use Map can be found in the Willow Creek Permit as Map #9.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Land Use or Air Quality surveys should not be required.

Prior to mining the Permittee will consult with the Division to discuss additional or updated surveys and or studies that might be necessary prior to second mining.

(Revised)
March, 2014

CHAPTER 5

ENGINEERING

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no additional surface disturbance.

The Engineering section of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 5 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

The Permittee will utilize the Willow Creek Mine proposed subsidence points located within the Kenilworth Lease. The subsidence monitoring points are shown on Willow Creek Map #20. The Permittee will start the subsidence monitoring, using the Willow Creek points within the Kenilworth Lease, one year prior to any second mining.

A subsidence Monitoring plan specific for the Kenilworth map is shown on Plate 25.

The production areas are shown on Plate 26 in the Tower Permit.

The mine workings are shown on Plate 29 in the Tower Permit.

A R2P2 will be submitted to the BLM at a later date.

The GVH locations are shown on Figure 1-1 in the Tower Permit.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Engineering surveys should not be required.
Prior to mining the Permittee will consult with the Division to discuss additional or updated surveys and or studies that might be necessary prior to second mining.

(Revised)
March, 2014

CHAPTER 6

GEOLOGY

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no additional surface disturbance.

The Geology section of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 6 information.

The general surface geology is shown on Map 21 in the Tower Permit.

Geologic Cross Section and Drill Hole References is shown on Plate 22 in the Tower Permit.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Geological information should not be required.

(Revised)
March, 2014

CHAPTER 7

HYDROLOGY

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no additional surface disturbance.

The Hydrology section of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 7 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

The Permittee will utilize the Willow Creek Mine proposed water monitoring locations located within the Kenilworth Lease. The water monitoring points and regional hydrology are shown on Willow Creek Map #15. Water Rights are shown on Willow Creek Map #17. The Permittee will begin water monitoring, using the Willow Creek points within the Kenilworth Lease, one year prior to any second mining.

Water Rights locations are also shown on Figure 5 of the Tower MRP.

Water monitoring locations are shown on Figure 6 of the Tower MRP.

Water Monitoring Locations are shown also on Figure 7-1 of the Tower MRP.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Engineering surveys should not be required.
Prior to mining the Permittee will consult with the Division to discuss additional or updated surveys and or studies that might be necessary prior to second mining.

(Revised)
March, 2014

CHAPTER 8

BONDING

Since the Kenilworth Lease boundary change is simply an extension of underground mine workings under roughly 2,600 to 3,000 feet of cover there will be absolutely no additional surface disturbance.

The Boding section of the Permit is addressed with the existing approved Mine and Reclamation Plan. Please refer to the approved Tower MRP (ACT 007/019) for current Chapter 8 information.

The Kenilworth lease has been previously permitted under the Willow Creek Mine Permit ACT/007/004.

The extension of the underground workings will not result in any additional surface disturbance therefore additional Boding should not be required.
