**Re: Start Bond Clock on GVH #12, #13,
#14, #15, #16 and #17, Confirm Bond
Clock on GVH's #1 and #5.**

Dear Mr. Haddock:

By means of this letter, UEI respectfully requests that the 10 year bond clock be started for Gob Vent Holes ("GVH)" #12, #13, #14, #15, #16, and #17. Also by this letter, UEI desires to confirm that the bond clock for GVH's #1 and #5 is at year 5.

In Section 341 of the approved Appendix X of the MRP states "Revegetation of the sites will occur in two phases. The first phase is to redistribute topsoil and seed the well area not needed for access and operation of the gas exhaust blower. The second phase will consist of plugging the well and distributing the remaining topsoil and seeding on the remaining pad area." "The sell sites will be fenced to discourage wildlife and livestock from grazing the reclaimed areas until bond release.

Gob Vent Holes #12, #13, and #14 have complete phase one and two referred to above. GVH's #12, #13, and #14 were plugged, seeded, and fenced in July and August of 2014 and are now ready to start the 10 year bond clock.

Gob Vent Holes #15, #16, and #17 were reclaimed and seeded in the fall of 2013 and were fenced in August of 2014. Since the holes were never drilled plugging is not required. GVH's #15, #16 and #17 are now ready to start the 10 year bond clock.

Gob Vent Holes #1 and #5 were reclaimed in 2009 and are in the 5th year of the 10 year reclamation clock. The sites were originally fenced but the fence has now been removed due to excellent reclamation success. Mt Nebo will complete the year 5 vegetation inventory this month.

If you have any questions please give me a call.

Sincerely,

R. Jay Marshall
Resident Agent
