1. Permits, Change, Transfer, Renewal, Sale

The permittee has one permitting action with the Division. It is the Centennial, Kenilworth Lease Addition, and review to be completed by May 20, 2016

2. Signs and Markers

The identification sign was inspected and meets the minimum requirements of the R645 Coal Rules. See Pictures

3. Topsoil

The topsoil piles are snow covered. There were no signs of wind or water erosion.

4.a Hydrologic Balance: Diversions

Some diversions were open but others still contained snow. See pictures. A spring clearing of the diversions will most likely be needed.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds did contain a small amount of water. It is unlikely that these sediment ponds will discharge in the near future. No hazardous conditions were noticed. Inlets and embankments were stable.

5. Explosives

No explosives are on site.

8. Noncoal Waste

It is possible that some of the old mining equipment could be considered as non-coal waste material. The permittee should identify those items and make sure they are properly stored.

10. Slides and Other Damage

No slides or other damage were noticed during the inspection.

15. Cessation of Operations

The shop building is used to repair mining equipment for Lila Canyon.

18. Support Facilities, Utility Installations

The shop building area is the only activity at the site.
