1. Permits, Change, Transfer, Renewal, Sale

There are no permitting actions with the Division at this time.

2. Signs and Markers

I inspected the identification sign and it meets the requirements of the R645 Coal Rules. The sign has all the required information. See Photo

3. Topsoil

The topsoil piles were snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated. See Photos

4.a Hydrologic Balance: Diversions

Diversions and culverts were completely snow covered. Due to low temperatures it is unlikely that the diversions had water flow. See Photos

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds are snow covered. No sediment pond was discharging during the inspection. It is unlikely that these sediment ponds will discharge in the near future. Embankments, inlets and outlets are snow covered. See Photos

8. Noncoal Waste

I did not notice any non-coal waste materials. The mine site is completely snow covered.

10. Slides and Other Damage

No slides or other damage was notice during the inspection. The mine site appears to be stable.

15. Cessation of Operations

Only the shop building is actively repairing mining equipment.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem. The roads were snow covered.
