I spoke with Mr. Hodges prior to the May 31, 2018 Centennial inspection. It was our first contact since Liberty Pioneer's pressure testing evaluation of the de-gasification wells in the fall 2017.

Subject: Andalex Vent Wells

To: [priscillaburton@utah.gov](mailto:priscillaburton@utah.gov)

Priscilla-

It was nice talking with you yesterday and today and good luck on your field trip out to the GVH wells tomorrow.

As discussed on the phone, the GVH wells are currently shut-in until Andalex resumes operations at the mine or until sufficient gas/pressure builds up at the wellhead to warrant opening the wells back up and producing them. If Andalex resumes operations then the GVH wells would be used to vent the gases from the mine and we would process and sell the gas.

Keep me posted if any new developments occur on the field trip tomorrow.

Regards,  
Kimball
