Subject: Re: [EXTERNAL] 007/0019 Centennial degas well closure plan

To: Priscilla Burton <priscillaburton@utah.gov>

Thank you for the copies of the plugging plan for the Gob Vent Holes at Andalex's Tower Mine property. We have looked at the plugging plan for these holes and find them adequate for sealing the holes. As these holes are on Federal coal ownership (now unleased as the former leases have been relinquished by Andalex), the plugging plan should provide protection for the unleased Federal coal. We would ask you to keep us informed of when work begins at the site.

Thanks,  
Steve

Hello Steve,

I have attached the UEI/Andalex closure plan for degas wells 3,4 5A, 6, 7, 7A and 11. I also attached a figure showing the location of these wells.

I will keep you informed of the timing of closure. It is dependent on access, but will take place this field season and will be completed by August 1, 2019.

Please reply with your comments on the well closure.
