4.a Hydrologic Balance: Diversions

The inlets to bypass culverts were inspected for permit compliance. Each inlet inspected is clear of debris and is functioning as designed. All undisturbed drainages reporting to the inspected bypass inlets are dry and appear to have not conveyed flow for quite some time.

Disturbed area runoff reports to diversions throughout the surface area facilities. All diversions were clear of debris and are functioning properly and will convey surface runoff to sediment impoundments.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds were inspected for permit compliance. Sediment ponds C and E and Settling Basin B were dry at the time of the inspection. Inlets and outlets of the impoundments were functioning properly as designed.

4.d Hydrologic Balance: Water Monitoring

Well No. 1 was inspected. The pump to purge the well for sampling water quality is in proper working condition.
