RE: Division Order 99B, Lodestar, Horizon Mine, ACT/007/020, Folder #2, Carbon County, Utah

This responds to the major issues with the Division Order 99B.

-Snow storage area is approved as submitted.

-Coal conveyance system needs to be amended.

It should be noted that the upper part should be deleted, that portion lying in an easterly direction. Further, the exact location must be described in relation to the coal drop points 1 and 2 adjacent to that proposed shop building.

-Coal storage area needs to be amended.

It appears that the area lying east of the area as explained in the coal conveyance needs to be amended. The key point here is--will coal from three drop areas be involved or from only one drop area be involved?

-Coal waste area needs to be amended.

The problem comes about as a result of the clean out material from silt fences, sediment ponds and ditches. Now that the company does not have any waste pile; their is a need to consider a place for this material. It will be used as backfilling material in final reclamation.
