REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

| 22. Other | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

2. Signs and Markers

The mine ID sign was observed at the point of public access to the mine. The sign contained the name of the mine, address, phone number, permit number, and MSHA number.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Second quarter 2009 sediment pond inspection was done on 06/30/2009. Sediiment level is above the 60% sediment elevation. Pond still needs to be cleaned.

4.d Hydrologic Balance: Water Monitoring

Second quarter 2009 water monitoring information is in the EDI website. The information still needs to be uploaded. Water monitoring is current.

5. Explosives

Explosive magazines have been removed from the site.

18. Support Facilities, Utility Installations

The dust suppression system at the coal stacking tube area and truck load out was functioning during the inspection. The dust suppression system is water sprays that spray from the top of the stacking tube and conveyor system to minimize coal dust from the coal stockpile and loading operations.
