Kit,

We were putting your permit renewal together for the Horizon mine and identified a problem. The Public notice for the renewal was only run for two weeks rather than the required four weeks. It looks like it was run for four consecutive "issues" instead of the four consecutive "weeks" that is required by the rules at R645-300-121.

It looks like an honest mistake, but we probably need to fix it as best as we can. You will need to republish the notice as required for the four consecutive weeks and allow for another comment period. In the mean time we will go ahead and renew your permit, but with a condition that if any one comments or requests a hearing, we will need to hold a hearing and deal with the issues raised.

Give me a call at (801) 538-5325 if you have any questions.
