2. Signs and Markers

The mine identification sign is located along side of the carbon county road used for access to the mine site. The sign contains the name, address, phone number and mining permit number. The sign was found to be in compliance with the regulation requirements of the Utah Coal Rules.

4.a Hydrologic Balance: Diversions

The main diversion that runs along side of the mine access road that leads to the portal and bath house area was open and functional.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond water level has increased in elevation since the previous inspection and is near to the discharge level. The sediment pond surface is frozen solid. The operator needs to monitor the sediment pond closely and if a discharge occurs a sample will be required.

5. Explosives

The explosive magazines are properly grounded and signed.

8. Noncoal Waste

The mine site was found to be free of noncoal waste items during the partial inspection.
