Alex-

Just so I understand, could you explain why cleaning out that culvert will take more than a week?

Amanda:

Last week I made arrangements for the work necessary to abate the above captioned NOV's. I am informed that it will take two weeks to complete the necessary work. Accordingly, I am requesting that you extend the deadline for that work by two weeks from today's date.

Please let me know if you need any additional information in this regard.

Thank you for your consideration.

Alex

Thanks for the explanation, I have to give a reason to modify the NOV abatement date, so that helps. I'll push the abatement date on NOV 21151 (culverts) back to August 3rd. The abatement time frame for NOV 21153 (topsoil piles) was already two weeks, so I'll leave that at August 3rd as well. Let me know if there is anything else. I'll email you a copy of the NOV 21151 date modification today.

Amanda:

The work to abate the NOV's is rather labor intensive. Cleaning the culverts is not a simple matter of shoveling. As your inspection report notes, the inlet was under water and filled with mud. Cleaning it involves mucking out the water with buckets and shoveling out everything by hand. The same is true for the outlet. It all has to be done manually. That is why I am requesting an extension.

In accordance with the provisions of the Utah Coal Mining and Reclamation Act, Utah Code Ann. § 40-10-1 et. seq. (Act), the above referenced Citation is:

Modified as follows:
 Actions Required:
 Remove mud and debris blocking the inlet of DC-2, and remove sediment from the outlet of UC-1. These culverts should be maintained to function as originally designed and approved in the Mining and Reclamation Plan. This work must be completed by August 3, 2015.

Reason for modification:
 One additional week was requested by the operator to complete abatement work. This was requested due to the amount of hand labor required to remove all the mud and water.

Terminated because:

Vacated because:
