Three seed suppliers were asked to provide estimates on the seed mixes. This is the response from the DWR's Great Basin Seed in Ephraim.

Priscilla,

I apologize it has taken me so long to respond to you. Attached are the estimates of the items we currently have available in stock. You will see we don't have a number of the items you are requesting. There are a couple things we can do: 1) we can offer some substitute species (some other riparian species we have in stock are listed at the bottom of that estimate), 2) we can provide what we have and then procure what else is needed from private vendors (we can provide a list of a few to try or contact them ourselves) and then mix it all for you, or 3) we can put the missing items on our bid that will be going out in June. This 3rd option would mean prices may change and because of the small quantity and specialty of some of these species we may not be able to acquire all of them. As it is I would probably suggest a combination of options 1) & 2). Let me know your thoughts. I will be out of the office in meetings again today after 10 am, but if you want to contact me on my cell to discuss I will answer if I can. Thanks.

Hi Danny,

Thank you for your call letting me know that you can provide seed to us at the Division of Oil, Gas & Mining. I have attached a copy of two seed mixes that we'd like to order for seeding in August 2018. Could you provide an estimate for each mix? The acreage is listed at the top of the page for each mix.

Thank you!
Priscilla
