RE: Technical Assistance  
Concerning Revegetation  
Reclamation

Dear Mr. Harvey:

I am replying to your request for technical assistance concerning the use of non-native species for the revegetation of mined lands. I am enclosing some publications which should aid you in your search for non-native species and literature and pertinent research to substantiate their use. Also, the following publications which you would be able to send for should be quite helpful in deriving more information on the subject.

1. Follett, R. F. 1980. Reclamation and Revegetation of Land Areas Disturbed by Man; An Annotated Bibliography of Agricultural Research, 1972-1980. United States Department of Agriculture. Bibliographies and Literature of Agriculture Number. 55 pp.
2. Characteristics of Plants used in Western Reclamation by Stephen G. Long of E.R.T., P. O. Box 2105, 1716 Heath Parkway, Fort Collins, Colorado 80522.
3. Plummer, A. P., D. R. Christensen, and S. B. Monsen. 1968. Restoring Big Game Range in Utah. Utah Division of Wildlife Resources. Publication 68-3.

I hope these references will supply you with sufficient information. Feel free to contact the Division if you find yourself in need of assistance.

Sincerely,

TONIA TORRENCE *TT*  
RECLAMATION BIOLOGIST
