

November 29, 1982

Inspection Memo  
to Coal File#7  
RE: Blazon Mine  
Blazon Company  
ACT/007/021  
Carbon County, Utah

An inspection of the Blazon Mine was conducted on November 17, 1982 by Sandy Pruitt. The gate was locked but the road had been plowed up to the mine shop and past the mine yard toward the drill site to the south. Sanders Exploration Company is storing equipment on site, there is no other evidence of recent activity. Maintenance of runoff control structures has not been initiated. Mr. Allen Smith, North American Equities, called on November 29, 1982 and acknowledged receipt of the November 10, 1982 memo. Compliance requirements were reiterated in the phone conversation. He committed to abatement in the near future.
