Inspection Memo  
to Coal File:

RE: Blazon Mine  
Blazon Company  
ACT/007/021  
Carbon County, Utah

The Blazon minesite was visited by Sandy Pruitt on April 8, 1982. The mine has been inactive since February 1982. The mine facilities are inaccessible by vehicle due to snow. The access gate is locked and there is no evidence of recent activity at the mine. The portal entries are fenced and posted with warning signs. The fan is not operating and no other facilities appeared operational. No hazardous conditions were apparent.

SANDY PRUITT
