Inspection Memo to Coal File:

#7

RE: Blazon Mine  
Blazon Coal Company  
ACT/007/021  
Carbon County, Utah

An inspection of the above mentioned operation was conducted by Jodie Merriman and Frank Atencio of OSM and Sandy Pruitt of DOGM, on January 4, 1983. There was no one present on-site and no evidence of any recent activity. The access gate is locked and the road hasn't been plowed in months. Due to snow cover it was difficult to determine with certainty if a berm had been reconstructed along the perimeter of the mine yard above Mud Creek. By all appearances no work had been done as requested. Once adequate evidence can be obtained, a violation will be issued for the inadequate control of disturbed area runoff.
