CERTIFIED RETURN RECEIPT REQUESTED
P402-459-458

Mr. Alan Smith
North American Equities
1401 17th Street, Suite 1510
Denver, Colorado 80202

Dear Mr. ^{Alan} Smith:

Re: Permit Stipulations, Blazon #1 Mine, INA/007/021, Carbon
County, Utah

Mr. Jack Otani has indicated to the Division that reclamation construction activities will commence at the Blazon #1 Mine in the near future. Please notify the Division as to the date on which you wish to commence reclamation work at Blazon. This notification is required in order to change the mine from inactive to active status. We shall also need the name and location of the authorized person to contact regarding regulatory requirements and permit compliance during the construction period.

In relation to the removal of the waste materials from Little Snyder drainage, please review Stipulation UMC 817.44-(1-2) (copy attached) which calls for the submission of channel designs for the reconstruction of Little Snyder drainage. Due to instability problems associated with this drainage as indicated by Mr. Otani, and the 15 day response required under this stipulation, it is appropriate to notify you of our concerns at this time. The 15 day response period will not commence until such time as the contractor has sufficiently removed the waste material so that an evaluation of the drainage can be made. In view of the time frames in the stipulations, I would encourage you to have the persons who will be responsible for these designs contact either Susan Linner or Rick Summers to review the intent of the stipulations.

July 15, 1987

Mr. Otani has requested approval for the commencement of reclamation work at the site. The Division concurs that relocation of the waste material and completion of demolition and cleanup can commence immediately upon notification to the Division. Please convey this approval to Mr. Otani and others who may be involved in work at the site.

Please notify the Division should any further discussion of these matters be required by contacting Sue Linner or Rick Summers.

Sincerely,

L. P. Braxton

STIPULATIONS

North American Equities NV
Blazon #1 Mine
INA/007/021
Carbon County, Utah

October 8, 1985

Stipulation UMC 817.24-(1)-JSL

1. As is planned on the downslope side of the portal bench (Area E), Area C (Little Snyder drainage) must also be netted with a nylon netting to anchor the mulch and protect the soil material.

Stipulation 817.25-(1)-JSL

1. All nutrients recommended excluding 75% of the nitrogen requirement must be broadcast and ripped in at the time when the soil is being scarified. The remaining nitrogen must be applied the following spring after arboreal transplanting.

Stipulations 817.44-(1-2)-RS

1. The permittee shall submit complete and adequate designs for a stable channel through the mine waste development area within 15 days of notification by the regulatory authority regarding need for said designs. Division notification will be based upon an onsite inspection of the conditions existing at the channel following removal of the waste material. The designs must be approved and implemented within 30 days of said notification.
2. The permittee must submit complete and adequate plans for an energy dissipater and culvert headwall for dissipation of the flow from the restored channel to culverts D and D' within 7 days of commencement of excavation for the installation of culvert D' and no longer than 20 days following completion of removal of the mine development waste pile phase of the reclamation process. The designs must be approved and implemented at the site within 30 days following the commencement of the excavation for culvert D'.

Stipulation UMC 817.53-(1)-DD

1. The applicant shall notify the Division of Oil, Gas and Mining about the status of the well transfer application by January 30, 1986. If the transfer of the well is not approved by the State Engineer, the applicant shall reclaim the well site within 30 days of notification.
