FROM: Lynn Kunzler, Reclamation Biologist *LK*
RE: Review of NAE's Weed Control Plan, Blazon #1 Mine,
ACT/007/021-89B, Folder #2, Carbon County, Utah

Summary:

The above referenced plan received on June 7, 1989 to abate NOV #N89-17-1-2, 2 of 2 has been reviewed and found to be complete and adequate for approval.

Analysis:

UMC 784.13(b)(5)(v):

The proposed plan provides for monitoring the site each year of the liability period for the presence of Quackgrass, Field bindweed or Wild oats (state designated noxious weeds) that were introduced to the site in contaminated straw. Monitoring is planned to identify the weeds prior to seed set so that control measures (mechanical or chemical) can be implemented in a timely manner.

Recommendations:

The referenced weed control plan should be approved and implemented accordingly.
