TO: Daron Haddock, Permit Supervisor

FROM: Randy Harden, Reclamation Technician 

RE: NOV N90-13-2-1, Blazon #1 Mine, North American Equities, INA/007/021, Folder #2, Carbon County, Utah

**Summary:**

EarthFax has resubmitted drawings delineating the location and the extent of the disturbed area associated with the action required under NOV N90-13-2-1. This NOV was written to incorporate the cut slopes of the mine access road into the disturbed area boundaries for the Blazon #1 Mine.

These drawings in conjunction with the information submitted earlier by EarthFax, constitute sufficient information to address the abatement requirements of the Notice Of Violation.

**Analysis:**

Plates 1,10, and 11 of the Reclamation As-Built Plans for the Blazon #1 Mine have been revised to show the location and extent of the disturbed area boundaries. Previously, EarthFax had submitted plans for incorporation of this area into the existing reclamation plan. as indicated in the text of that information, revegetation of this area would occur on or before October 30 of this year, or, as would be commensurate with the outcome of the pending Board Hearings regarding other pending issues pertinent to reclamation of the Blazon #1 Mine.

In as much as the operator has revised the drawings to include these areas in the plan and the text has provided a commitment to revegetate this area in accordance with the previously approved revegetation plan, the operator is considered to be in compliance with the requirements of the regulations and the information submitted constitutes proper termination of NOV N90-13-3-1.
