Re: Proposed 1995 Reclamation Activities ACT/007/021 & AMR/007/924/R

Dear Mr. Braxton:

The Surface Land Owners are hereby refusing to allow any and all proposed work by the Utah Division of Oil, Gas & Mining for the following reasons;

The Division letter of June 26, 1995 sent to Jack & Sei Otani approaches deception in the fact that I, Steve Tanner told both Luci Malin and Louis Admot the Division had once again failed to abide by the rules, regulations and Land Owner requests and that I am forced to deny access to said property. I so stated I would not allow the Division on the property until the Division acted responsible and a full reclamation was in the hands of the Land Owners for approval (Letter June 3, 1994. Also since the Division had no way of knowing if Jack and I had conversed about this matter, it would appear the Division is intentionally trying to deceive Jack & Sei Otani by not clearly stating my position

The Land Owners have been sidelined again even after requesting we approve any and all aspects of any proposed work to be done regarding this property

No Closure Plan was submitted to Land Owner

Proposed Contractor and qualifications were not submitted to us for our approval

The requested June 3, 1994, Scope of Work, for total reclamation of the effected area has yet to be submitted to the Land Owners

Division fails to notify Land Owners time and date of site visit

The Division fails to present credentials and liability insurance policy

of the Second Party taken on our property in last month exposing the Land Owner once again to suit

Should you have any questions concerning this matter, call Jack Otani or myself in Sells, Arizona after the 15th of July, 1995.

Sincerely,

SKT *Jack Sei Otani*
