Compliance With Permanent Performance Standards

UMC 771 et al Permits

Tentative approval signed by Jim Smith of the Division is dated December 11, 1981.

A letter dated June 3, 1983 by Rick Summers of the Division approves an extended deadline on construction of the overflow pond.

UMC 817.11 Signs and Markers

The entrance sign was posted as requested with all pertinent information listed. Perimeter markers were sighted along the boundary on all sides.

UMC 817.21-25 Topsoil

The topsoil stockpile still has marginal cover. Beaver Creek Coal has continued to make attempt to seed and stabilize this stockpile but growth remains limited.

UMC 817.41-.57 Hydrologic Balance

Pond #6 is slated to be cleaned now that it is dry. During the summer months the site remains fairly dry due to limited topography and high temperatures.

All ditches and berms viewed were functioning as designed and no problems were noted.
