Inspection Memo  
to Coal File:

RE: Beaver Creek Coal Company  
Castle Valley Spur  
ACT/007/022, Folder #7  
Carbon County, Utah

A partial inspection was conducted at the above mentioned mine site by Barton Kale of the Division on January 18, 1984. The inspector was accompanied by Scott Raymond of the Beaver Creek Coal Company.

At the time of the inspection the plant was not operating due to current run of mine coal contacts. The area is still actively used as a loadout, and scale facilities.

All the sediment ponds were viewed with no problem evident. The ditches appeared to be functioning although no runoff was occurring.

A further tour around the property revealed no major problem.
