RE: C.V. Spur  
ACT/007/022  
Carbon County, Utah

Dear Mr. Hedberg:

Per our phone conversation of June 12, 1985, I have enclosed a map showing the location of the proposed new spray tank/pump shed to be placed adjacent to our silo.

This shed will replace a smaller, existing shed that houses the spray pumps and panels; the tank is not enclosed at this time. The proposed shed will cover both the pumps and the tank. It will have a small footer and 2 doors; the floor will be gravel. The tank and pumps are used for the dust control (encrusting) agent sprays for the railcars as they are loaded in the silo. This proposal will not necessitate any changes in drainage, bonding, or location of surface facilities.

I hope you will agree with this proposal. If you have any questions, please let me know.

Respectfully,

Dan W. Guy  
Manager of Permitting and Compliance
