Re: Ditch Typical Amendment  
C.V. Spur  
ACT/007/022  
Carbon County, Utah

Dear Mr. Braxton:

Enclosed are three copies each of a proposed amendment to the typical cross-sections of the C.V. Spur collection ditches and diversion ditch DD-1. The amendment is in the form of a note on each plate stating that ditch configurations may vary but minimum cross-sectional areas will be maintained as shown.

This request is made to allow for the likelihood that ditch shapes will vary according to the type of maintenance equipment used (i.e. backhoe, grader, etc.), and to allow for ditches that have reached a stable configuration to remain without the necessity of regrading inslopes, destroying vegetation along the banks, and exposing barren soil to erosion. I have discussed this situation with Messrs. Whitehead and Malencik of your staff.

It is our hope you will agree with this proposed amendment. Additional maps will be sent upon approval at your request.

If you have any questions, or need any further information, please let me know.

Respectfully,

Dan W. Guy  
Manager Permitting/Compliance
