PERMIT NUMBER: ACT/007/022

DATE OF INSPECTION July 14, 1987

(Comments are Numbered to Correspond with Topics Listed Above)

GENERAL:

Site conditions at C. V. Spur remained unchanged from the previous visit on June 29, 1987. No significant problems were uncovered.

1. PERMITS:

MRP was recently amended after appropriate deliberation. The significant changes included:

- A. Deleting five sampling wells; however, the wells will be capped and left in place for possible future use.
- B. Wells CV-0-W (ditch), CV-1-W, CV-3W, CV-4W, CV-5W, CV-6W, CV-10-W, CV-11-W, CV-12-W, and CV-14-W (ditch) will be monitored biannually.
- C. Revised water reporting format was prescribed, together with specified elements to be analyzed.

3. TOPSOIL:

Sparse vegetation was growing on the topsoil pile. Prairie dogs were active at the topsoil pile.

4e. SURFACE AND GROUNDWATER MONITORING:

Surface and groundwater monitoring records were reviewed and the following information was extracted from the records:

- A. Monitoring station CV-0, on the northwest corner, is a ditch that exits into a french drain.
- B. On July 15, 1987, further boron and fluoride background sampling will be eliminated from the MRP.

7. COAL PROCESSING WASTE:

Refuse pile was in good shape. Volunteer vegetation continues to grow on the undisturbed portion of the refuse pile. While the majority of the plants are forbs, some woody plants are also becoming established.
