RE: Mid-Term Review Responses, C.V. Spur Preparation Plant, Beaver Creek Coal Company, ACT/007/022, Folder #2, Carbon County, Utah

A revised paged 3-17 was submitted by Beaver Creek Coal Company on January 9, 1987. The operator revised the text to read, "Once a fire is extinguished, a layer of incombustible material at least eighteen inches will be placed" . This response is adequate.
