INSPECTION REPORT COMMENTS

Permit No. Act 007/022

Inspection Date 1/28/97

Please number comments to correspond with topics on previous page.

General Comments. The coal terminal site was covered with snow. Most of the snow that fell the previous weekend, approximately 31" was still on the ground, even though it had settled. Last weekend another 15" of snow was deposited. The haul roads and action pad areas were cleared. The snow was stockpiled and the runoff reported to sediment ponds; however, no significant runoff was observed.

Sediment Pond. Observed pond #6. It contained runoff and was at the same level per the 12/4/96 report.

Coal Mine Waste. No coal mine waste is being generated at the present time. The road to the refuse pile was snow covered.

Roads. The haul roads were wet. No ruts were visible that would result in water concentrating on the roads.

Other. With snow conditions, did not inspect the undisturbed areas with respect to matters discussed in the 12/4/96 inspection report.
