Re: *Water Monitoring Wells
Proposed Amendment
Savage Coal Terminal
ACT/007/022; Folder #2
Carbon County, Utah*

Dear Mr. Helfrich:

In response to the February 19, 1998 letter from Mr. Malencik, Savage Industries, Inc. has decided to pursue Option No. 3, justifying the proposed elimination of ground water monitoring wells CV-10W and CV-11W. In fact, this amendment will propose elimination of all ground water monitoring wells except CV-1W, the French Drain well.

Ground water monitoring data for the site has been evaluated for the past 5 years - which includes the time prior to Savage Industries' purchase of the site. This data, along with other justification specific to each well, is presented in the attached Appendix 7-1.

While the letter was specific to wells CV-10W and CV-11W, upon examination, it was apparent that many of the wells are either dry or not located on property controlled by Savage Industries; therefore, it was decided to evaluate each of the wells and determine their value. Wells CV-10W and CV-11W have been destroyed by the land owner - they were in a field which is regularly plowed, irrigated and used for cattle grazing. Wells CV-3W and CV-12W are also located on property controlled by others, and eventually, will likely suffer the same fate. Wells CV-0W, CV-4W, CV-5W, CV-10W and CV-12W have been dry since 1992. The data and justifications in Appendix 7-1 will provide details specific to each well.

The proposed data and justifications have been submitted as an Appendix;

however, applicable pages and plates have also been amended for the permit. Required change forms are also enclosed.

It is our hope this proposal will meet with your approval. If you have any questions or need additional information, please contact me at (435) 637-5664 or Dan Guy at (435) 637-2422.

Sincerely,
